

## Specimen Label

# A CONTROLLED RELEASE BRIQUET— PREVENTS ADULT MOSQUITO EMERGENCE (INCLUDING THOSE WHICH MAY TRANSMIT WEST NILE VIRUS)

ACTIVE INGREDIENT:

(S)-Methoprene (CAS #65733-16-6): .....	2.5%
OTHER INGREDIENTS: .....	97.5%
TOTAL: .....	100.0%

The ingredient statement is expressed on a dry weight basis. This product contains residual water—the weight of the briquet and percent by weight of active ingredient will vary with hydration.

**KEEP OUT OF REACH OF CHILDREN**  
**CAUTION**  
See below for additional precautionary statements

**PRECAUTIONARY STATEMENTS**

**HAZARDS TO HUMANS AND DOMESTIC ANIMALS**

**CAUTION**

Causes moderate eye irritation. Avoid contact with skin, eyes, or clothing. Wash thoroughly with soap and water after handling. Remove contaminated clothing and wash clothing before reuse.

<b>FIRST AID</b>	
If in eyes	<ul style="list-style-type: none"> <li>Hold eye open and rinse slowly and gently with water for 15-20 minutes.</li> <li>Remove contact lenses, if present, after the first 5 minutes, then continue rinsing eye.</li> <li>Call a poison control center or doctor for treatment advice.</li> </ul>
If on skin	<ul style="list-style-type: none"> <li>Take off contaminated clothing.</li> <li>Rinse skin immediately with plenty of water for 15-20 minutes.</li> <li>Call a poison control center or doctor for treatment advice.</li> </ul>
<p>Have the product container or label with you when calling a poison control center or doctor, or going for treatment. You may also contact 1-800-222-1222 for emergency medical treatment information.</p>	

**ENVIRONMENTAL HAZARDS**

Do not contaminate water when disposing of equipment washwaters or rinsate.

**INTRODUCTION**

**Aquaprene™ Briquets** effectively control mosquito breeding sites for up to 45 days. The briquet continuously releases the insect growth regulator S-Methoprene in treated water as the briquet dissolves to prevent adult mosquito development. Treated larvae develop normally to the pupal stage where they die. **Aquaprene Briquets** prevent the emergence of adult mosquitoes, which are known vectors of diseases, and may transmit West Nile Virus.

**DIRECTIONS FOR USE**

It is a violation of Federal Law to use this product in a manner inconsistent with its labeling.

**APPLICATION DIRECTIONS**

Apply **Aquaprene Briquets** in mosquito breeding sites before or at any time during the mosquito season. **Aquaprene Briquets** can be applied to breeding sites when the sites are dry. Under typical environmental conditions, **Aquaprene Briquets** will control for up to 45 days. Alternate wetting and drying will not reduce briquet effectiveness. For best results, continue treatments on regular intervals throughout the mosquito season. The active ingredient S-Methoprene has no effect on mosquitoes that have reached the pupal or adult stage prior to treatment.

**APPLICATION RATES**

*Aedes, Ochlerotatus, Anopheles and Psorophora spp.:*

Place 1 briquet in areas up to 200 ft<sup>2</sup> of water surface. For large sites, apply 1 additional briquet for each additional 200 square feet. When possible, place briquets in the lowest areas of each site to maintain continuous control as sites alternately flood and dry. As sites begin drying, larvae will move with the water as it recedes into the low areas containing briquets, ensuring effective control.

*Culex, Culiseta, Coquillettidia and Mansonia spp.:*

Place 1 briquet in areas up to 100 ft<sup>2</sup> of water surface. For large sites, apply 1 additional briquet for each additional 100 square feet. To control Culex sp. in storm water drainage areas, sewers, and catch basins place 1 briquet into each basin.

**APPLICATION SITES**

Apply **Aquaprene Briquets** pre-hatch or post-hatch as directed above to temporary and permanent water sites which support mosquito larval development. Examples of typical sites are: freshwater and salt water marshes, cattail marshes, woodland pools and meadows, grassy swales, floodplains, irrigated croplands, pastures and rangeland (without removal of livestock), water hyacinth beds, vegetation-choked phosphate pits, dredge spoil sites, wastewater treatment facilities, waste settling ponds, sewers, septic ditches, animal waste effluent lagoons, catch basins, storm water retention basins, storm drains, retention and detention ponds, drainage areas, roadside ditches, tree holes, log decks, tires, water-holding receptacles, ornamental ponds and fountains, animal watering troughs and ponds, fish ponds, flooded crypts, transformer vaults, abandoned swimming pools, artificial water-holding containers, and other natural and manmade depressions where mosquitoes may breed.

For best results in soft bottom sites, suspend briquets in cages using stakes or floats to prevent briquets from sinking into the sediment. Also use cages where the briquet can be removed from the site by flushing action.

## Specimen Label

**STORAGE AND DISPOSAL**

Do not contaminate water, food or feed by storage and disposal.

PESTICIDE STORAGE: Store in a cool, dry place.

PESTICIDE DISPOSAL: Wastes resulting from this product may be disposed of on site or at an approved waste disposal facility.

CONTAINER DISPOSAL: Completely empty bag. Then dispose of empty bag in trash.  
Do not reuse container.

**WARRANTY AND CONDITIONS OF SALE**

Seller makes no warranty, express or implied, concerning the use and handling of this product other than indicated on the label. To the fullest extent permitted by law, buyer assumes all risks of use and handling of this material when such use and handling are contrary to label instructions.

Always read the label before using this product.
